SUMMARY OF THE INVENTION

A new laminated glass messaging/signage device that can be used along or with other neon tubing sign and other glass signs in the future. It can be installed when glass is being manufactured to make window glass for any type of business or homes. It will be installed on the inside of the first layer of glass, covered by the second layer of glass with a wire connection attach to glass. This new device could be made of an illuminate film it will be activated by a microchip/program chip to display manes different type of phrase and a wire connection laminate inside of glass and powered by a power outage. Using this device you can illuminate any letters and numbers from inside or glass. The words open and close will illuminate inside window glass by using one of these illuminate films. Just imagine, your home can be found easier by an ambulance, the fire department, patrol car, cab driver, repair person and delivery person can depend on illuminate signs at day or night. Businesses can input various advertisement messages via with this device.

DESCRIPTION OF THE PREFERRED EMBODIMENT

FIG. 2. Shows microchip/program chip 2 and the wiring connection 7 laminate inside of inside of windows glass to operate the illuminate films LC, EL, LED or OLED. FIG. 8. Is a cross section of fig. 2 showing glass 1A and 1B with illuminating film 3 to be laminate as one whole glass.
